Employee Task List Control	2

New Features & Improvements | Mobile

Offline Mode

Improvements have been made to the Task List behavior when in offline mode. Users have always been able to complete Tasks without a connection to the Internet, and information would sync as soon as a connection was made. The Task List completion time would be listed as the time the connection was re-established, however now, when the information is synced, the displayed time will be the time the Task List was completed while in offline mode.

New Features & Improvements | Web

ASC - Report Range for Task List Summary and Task List Detail Report

Improvements have been made to the behavior of the Report Range when configuring the Task List Summary and Task List Details reports in the Above Store Console. The reports now read off the store's business hours and not the calendar dates.

Employee Task List Control

Employees in the Employee Task List control are now sorted by alphabetical order based on first name. This will apply for Android and iOS users as well.
