Scheduler - Labor Budget Tab Permission	3
Scheduler - Shift Transactions Crossing Multiple Day Parts	3

New Features & Improvements | Mobile

Time Off Approval Push Notifications

Previously, users with the Staff - Edit Employee Profile permission were able to receive Time Off Approval push notifications. The requirement has been changed so that only users with the **Home - Manage Time Off** permission will have the option to receive the notifications.

Editing Time Off by Range Approved Requests

Several improvements have been made to the process of editing pending and already-approved Time Off requests on the mobile apps so that sites using Time Off by Range are consistent with sites using Time Off by Day Parts.

New Features & Improvements | Web

Reporting - Day Notes in the Roster Report

Performance enhancements have been applied to the Roster Report so that Day Note preferences are saved on a per-user basis.

Reporting - Time Off & Request Report Improvements

The Time Off & Request Report has been improved to be backward-compatible to display partial approvals that were made in the old Time Off interface. For example, if an employee requested four days off, but the manager only approved the third day, the report will now reflect this. Furthermore, any Time Off that was approved and was then overridden in the Scheduler will be treated as a Denied status, but will still display as "Manager Override" in the status column of the report.

Scheduler - Labor Budget Tab Permission

Previously, users with the Forecasting - Labor Proforma Forecast permission had access to the Labor Budget tab in the Scheduler as well as the Labor Budget Tool in the Forecasting tab. The permission has been renamed to **Forecasting - Labor Budget Tool**, and will now only grant access to the tool in the Forecasting tab. A new permission has been created for access to the Labor Budget tab in the Scheduler. The **Scheduler - View Labor Budget Tab** permission has been assigned to all users with the Forecasting - Labor Budget Tool permission so no one will lose access to features they were previously used to seeing, but administrators can now decide who has access to what.

House Shift Manager 64 Schedule Summary Forecast Data Labor Budget Labor Volume			
Tue	Wed	Thu	Fri
\$415.49	\$55.23	\$183.90	\$259.19
\$0.00	\$0.00	\$0.00	\$0.00
(\$415.49)	(\$55.23)	(\$183.90)	(\$259.19)

Scheduler - Shift Transactions Crossing Multiple Day Parts

Sites using the New Scheduler will no longer allow shifts to be picked up or swapped if there is any overlapping of times, regardless of the Day Part the shifts reside. For example, if Johnny is scheduled from 10:00am - 5:00pm, he will not see Toni's 3:00pm - 9:00pm released shift since his scheduled shift won't be over when hers begins. The same rule applies when Toni clicks to view eligible swapping partners; she won't see Johnny as an option.
