New Features & Improvements | Mobile

Recruit: Importing Facebook Profile Picture

HotSchedules Android users can now choose to use their Facebook profile picture when creating their Recruit Account.

Recruit: Terminated Employee Ad

Terminated HotSchedules users attempting to log into their existing accounts, will now see a Recruit ad with an option to create a Recruit account.

New Features & Improvements | Web

New Scheduler: Auto-posting Changes to Posted Schedule

If a posted schedule is modified, but not manually reposted, it will automatically be reposted in the event that the session times out.

New Scheduler: Status of Manual or Auto-posted Schedules

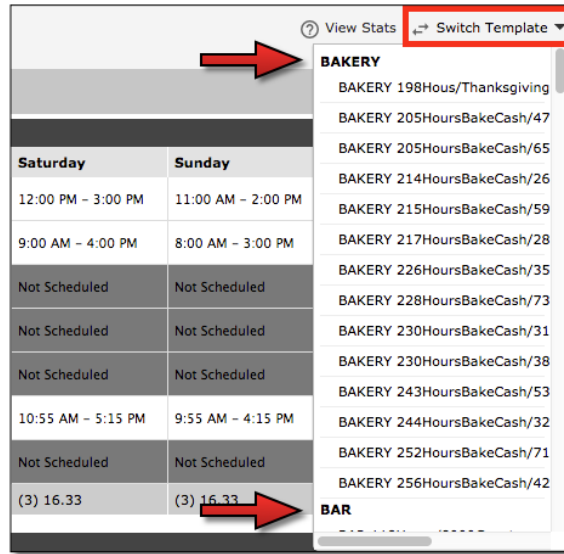

Schedules that have been reposted will now show a status of "Reposted" in all areas of the site.

Time Off & Requests: Editing Request Off/On End Date

The Request option within the new Time Off & Requests feature has been updated to allow users to adjust the end date of a requested timeframe to an earlier day. Previously, if users were within a range of dates that were requested on or off, they were not able to edit the last day. *Please note that users are not able to edit the type of Request if the cutoff date has already been reached.*

Template Generator: Organized Templates by Schedule

Searching for a template to edit within the Template Generator has been simplified by organizing the templates by Schedule.

Template Generator: Templates for Disabled and Hidden Schedules

Templates for schedules that have been hidden or disabled, are no longer accessible from the Switch Template option within the Template Generator.
