“New Candidates” Email	3

# New Features & Improvements | Mobile

## Improved Description Formatting

Improvements have been made to the consistency of how users' About descriptions appear for other users.

# New Features & Improvements | Web

## Invalid Zip Codes

When job seekers are entering their basic information, an invalid zip code will no longer let them proceed. A valid one will need to be entered before their application is submitted.

## Applying Through the External Job Board

Job Seekers that apply through the External Job Board are required to fill out their basic information before their application is submitted.

## Job Listing Improvements

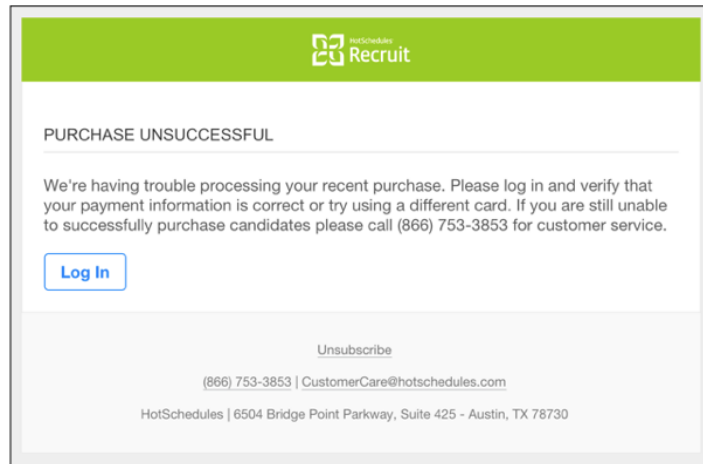

The Jobs List page has been improved so column spacing remains consistent on mobile browsers.

## Basic and Plus Job Candidate Count

Whether a job is a Basic or a Plus Job, the Candidate Count will start at zero when reposted.

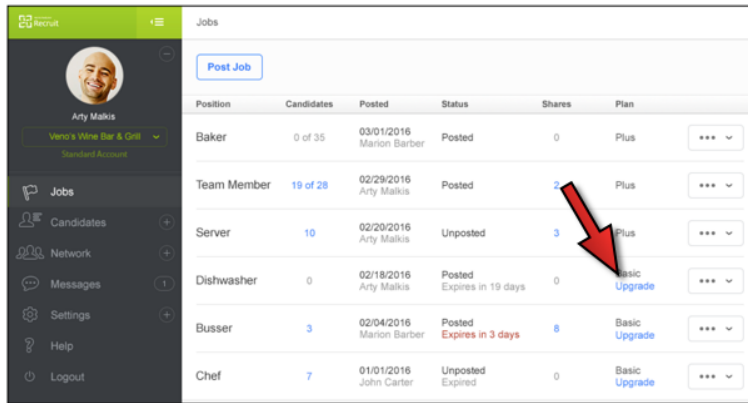

## Unsuccessful Purchase Emails

When a payment for a job posting fails, admin will receive an email letting them know, so they can take corrective action.

## Option to Upgrade Basic Jobs

Admin can easily upgrade Basic Jobs to Plus from their Jobs screen.

## Updated Job Details Header

The header in the Job Details side panel for unposted jobs has been updated to display "Edit Job Post."

## "New Candidates" Email

Managers can choose to receive an email when new candidates are available to review. The email preference can be found in the Settings tab.
