Dashboard Refresh

The Dashboard will now update with the most up to date information any time it is accessed.

ASC ToDos on Android

Above Store Console Android users can now assign ToDos to themselves and to the store-level users within their group of sites. The ASC user must have the "Assign New ToDos" and "New ToDos" store-level permission, and the users he or she is assigning the ToDos to needs the "New ToDos" user-permission. Although the ASC user can assign ToDos to him/herself, ToDos cannot be assigned to other ASC users.
