## Task Lists: Offline Support for Android

Task Lists can now be completed without the fear of losing any work due to a loss in network connection. While completing a Task List, if the app detects that there is no network connection, a yellow banner will display letting the user know they are working "offline."

Once the user has re-established their network connection, the app will automatically begin syncing any changes made while offline. At this point, the banner will change to green and once it disappears, all changes have been synced.

While in this "offline" mode, the user can continue to do the following:

- o   Complete tasks
- o   Add/Edit a Follow Up (includes comments & photos)
- o   Add/Edit a Task Item (includes comments & photos)
- o   Add/Edit a Task List Comment
