New Features & Improvements | Web

New Login Screen

Blue is the new green! The login screen has been beautified, along with the Help link. Clicking the question mark will direct users to help.hotschedules.com where they can access Release Notes as well as find a Contact Us section to submit a case with our Customer Care team.

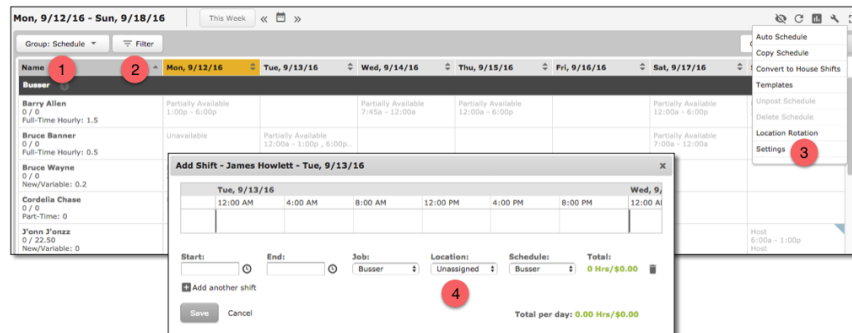

New Scheduler - Improvements to how Schedules are Copied

Performance improvements have been made to the copy schedules function, allowing users to copy more multiple schedules in a timely manner.

New Scheduler - Removed Locations When Not Used

Sites that do not use Locations, will no longer see Locations in the following:

- (1) Group
- (2) Filter
- (3) Settings
- (4) The Add/Edit Shift modal

The Locations label will still appear on the in-schedule Roster Report, SmartSelect, and AutoScheduler, but will be removed in a future Release.

With the necessary permissions, Locations can be configured by navigating to the Company sub-tab of the Settings tab, and selecting **Add** next to Locations.

New Scheduler - Availability Display

The text for Availability displayed in Classic View will now be based on a site's Day Parts rather than the calendar day. Previously, the site would show a partial availability on an otherwise-unavailable day due to the overlap of Day Parts and calendar days.

Let's look at an example. Alexis is available to work on Thursdays, and not available to work on Fridays.

ALEXIS A. NUNEZ							
General Availability Schedules/Jobs ACA							
Shift	Fri	Sat	Sun	Mon	Tue	Wed	Thu
AM	✗	✗	✓	✓	✓	✓	✓
PM	✗	✗	✓	✓	✓	✓	✓

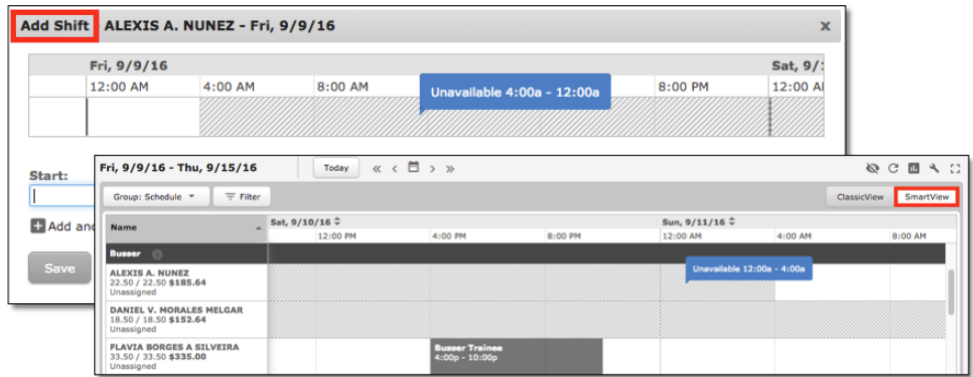

Her restaurant is on the 4:00am - 4:00pm and 4:00pm - 4:00am Day Part setup, so under the current model, when her managers are working on the schedule, it appears as though she is available from 12:00am - 4:00am on Fridays due to the fact that the PM Day Part from Thursday transcends the calendar day.

Name	Fri, 9/9/16	Sat, 9/10/16
Bartender		
AMANDO S. SANHUEZA 30.50 / 30.50 \$251.63 Unassigned	Bartender 3:30p - 8:30p	Bartender 3:00p - 8:30p
JOSE ARIEL RUIZ 0 / 38.00 \$532.00 Unassigned	Customer Service Repr... 5:00p - 10:30p CSR	Customer Service Repr... 4:00p - 10:30p CSR
RAPHAEL PIMENTEL DE SOUZA 25.50 / 25.50 \$210.40 Unassigned	Bartender 6:00p - 10:30p	Bartender 6:00p - 10:30p
Busser		
ALEXIS A. NUNEZ 22.50 / 22.50 \$185.64 Unassigned	Partially Available 12:00a - 4:00a	Unavailable

Now, to alleviate that confusion, the New Scheduler will no longer reference the calendar day when determining if an employee is available to work, and will inform the manager that Alexis is unavailable on Fridays.

ALEXIS A. NUNEZ 0 / 0 Unassigned	Unavailable	Unavailable
---	-------------	-------------

When looking at Availability in Smart View and the Add Shift modal, the shading will remain the same, as it has always referenced the calendar day.

New Scheduler - Daylight Savings

Measures have been taken to ensure that the New Scheduler is ready to turn the clock back an hour on the morning of Sunday, November 6th. This includes going over scheduled shifts as well as ensuring the Partial Available label appears correctly for that day.

New Scheduler - Editing Shifts with Associated Timecards

To avoid confusion, users are no longer able to edit shifts if there is an associated timecard for that shift.

New Scheduler - Printing Quick Tips

4.0.51.2 introduced the Quick Tips modal to New Scheduler users that tap the "? /" key on the keyboard. Now, users are able to print the contents of the modal by clicking Print.
