New Features & Improvements | Web

New Profile Wizard

The Profile Wizard has been updated so new Recruit users can easily configure their profiles.

The first step is to add a location. The location is pulled from users' IP addresses and then presented to allow confirmation. Location allows the correct job opportunities to appear for the jobseeker as well as inform employers where the candidate is from.

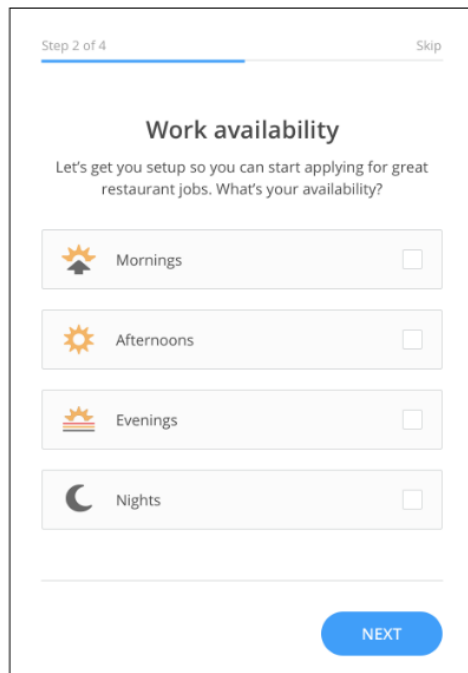

Step 1 of 4 Skip

Confirm your location

We'd like to make sure jobs, people, and other content we show is relevant to you.

[NEXT](#)

The second step in the process is to select an availability to provide to managers when applying to jobs.

Step 2 of 4 Skip

Work availability

Let's get you setup so you can start applying for great restaurant jobs. What's your availability?

Mornings

Afternoons

Evenings

Nights

[NEXT](#)

Users are able to add previous employers in the third step.

Step 3 of 4 Skip

Your most recent job

Adding a work history to your profile will increase your value to potential employers.

I'm looking for my first job

NEXT

The final step of the new Profile Wizard is to add a profile image. Users are able to upload an image from their device or they can import one from Facebook.

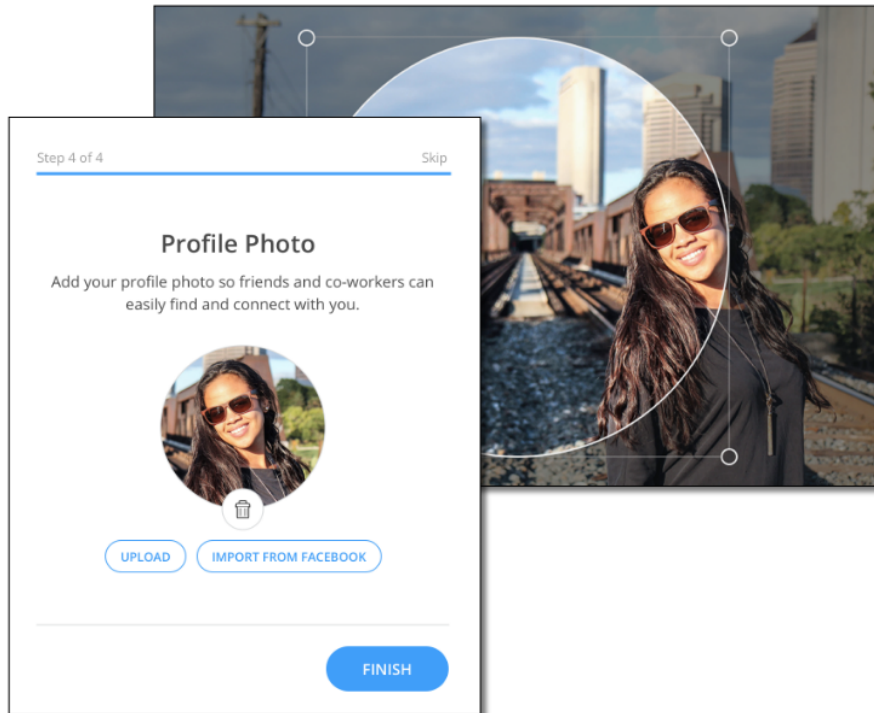

Step 4 of 4 Skip

Profile Photo

Add your profile photo so friends and co-workers can easily find and connect with you.

FINISH

Once an image is uploaded, users will be able to use a cropping tool to perfect their profile image.

Resetting Passwords

Resetting a forgotten password has always been as simple as clicking a link within an email, but now jobseekers who click the link will be taken to the Job Search page to complete the process. They will need to enter matching passwords that are at least 8 characters long before clicking **Save**.

A screenshot of a password reset form. At the top center is a logo consisting of four stylized human figures in red, green, blue, and yellow. Below the logo is the text "enter your new password below" with a horizontal line above it. There are two input fields: "New password" and "Confirm password". At the bottom left is a "Cancel" link, and at the bottom right is a blue "SAVE" button.

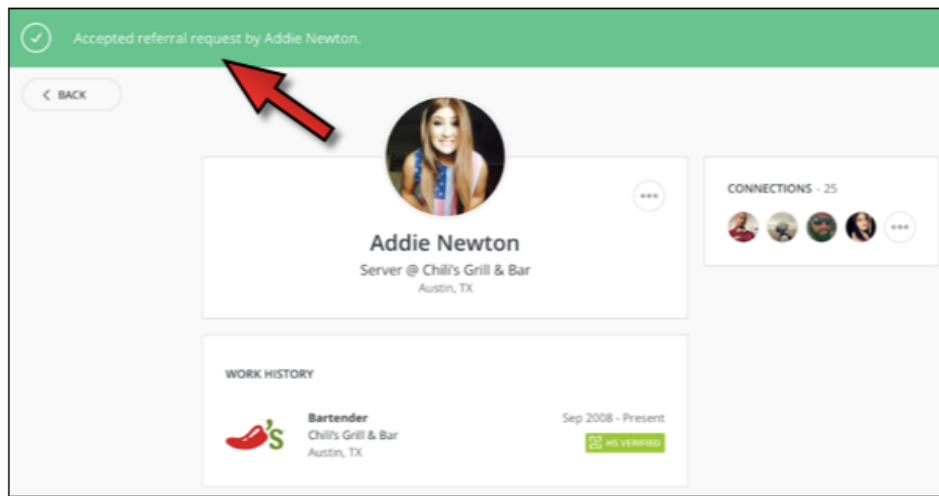

Once a new password is saved, jobseekers will need to log in to access their profile, otherwise they can continue their search without logging in.

Signing Up and Email Link Updates

Performance improvements have been made so that all instances of the old Profile Wizard have been removed from various screens during the signup process and email links.

Confirming Actions in Emails

The various emails Recruit sends to its users contain action buttons depending on the content of the email. For example, one jobseeker might request to connect with another, and from within the email sent to the latter, there is a button to accept the requested connection so he/she doesn't need to log in to do so. Clicking an action button in an email will now present users with a toast informing them the action was completed.

Currently-Employed Users and Find Talent

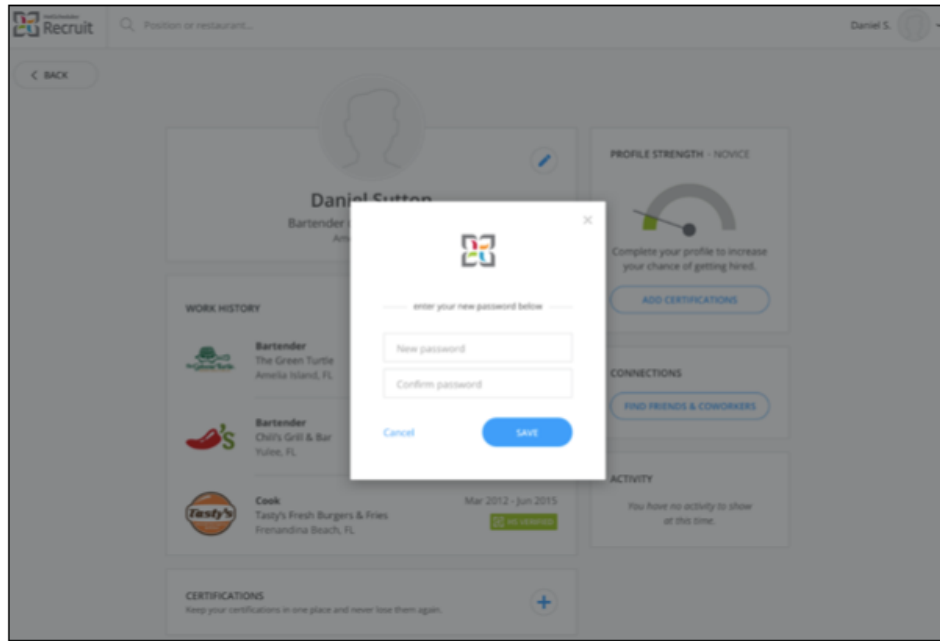

Current employees will no longer display for managers using the Find Talent feature.

Find Talent for All

The Find Talent menu item was previously intended for users of Pay-per-Post and Pay-per-Applicant users only, but it is now available for anyone to use.

Configuring Passwords for HotSchedules Employees

HotSchedules users with confirmed email addresses are invited to join Recruit with a Welcome email. Within the email, there is a link, and upon clicking the link, they will be logged into their new Recruit account and asked to create a password.

A second modal will appear once a password of 8 characters or more is created to welcome the new users, and allow them to continue on to their profiles. They will also have the option of returning to HotSchedules to check their schedules.
