RDS	
Server Manager	2
<b>Total</b>	<b>6</b>

## MacromatiX Mobile (MxConnect)

---

### **Expanded Mobile Reporting**

 **F26285, F26288, F26283**

Key operational and financial reports are now available in mobile-optimized formats, preserving existing calculations while improving usability and accessibility.

#### **Customer impact**

- ✓ Access critical reporting anywhere
- ✓ Faster operational and financial insights
- ✓ Reduced reliance on desktop-based workflows

### **Enhanced Cash & Payment Reconciliation**

 **F28617**

Cash handling and reconciliation processes have been enhanced to better align reported values with actual financial activity, including improved handling of payouts and third-party transactions.

#### **Customer impact**

- ✓ More accurate cash reconciliation
- ✓ Improved visibility into financial activity
- ✓ Reduced reconciliation discrepancies

### **Improved Forecasting Flexibility**

 **F28093**

Forecasting capabilities have been enhanced to support easier adjustments and improved alignment with actual selling patterns.

#### **Customer impact**

- ✓ More accurate demand forecasting

- ✓ Reduced manual effort in planning
- ✓ Better alignment between forecasts and operations

## **Enhanced Inventory Visibility**

 **F28094**

Inventory workflows now provide additional visibility into stock levels, recent activity, and ordering patterns to support more informed decisions.

### **Customer impact**

- ✓ Greater confidence in inventory accuracy
- ✓ Improved ordering decisions
- ✓ Better visibility into usage trends

## **Stronger Financial Controls for Sales Processing**

 **F28513**

Enhancements to sales processing and payment handling introduce improved automation, validation, and auditability

### **Customer impact**

- ✓ Reduced manual intervention
- ✓ Stronger financial governance
- ✓ Improved accuracy in transaction processing

## **Integrated Third-Party Payment Reconciliation**

 **F27725**

New capabilities provide structured reconciliation for third-party transactions directly within the platform.

### Customer impact

- ✓ Streamlined reconciliation processes
- ✓ Reduced reliance on external tools
- ✓ Improved visibility into variances

## MacromatiX Desktop (MMS)

---

### Enhanced User Provisioning

F28112

User management processes have been improved to support more consistent and automated assignment of roles and permissions.

### Customer impact

- ✓ Simplified user administration
- ✓ Improved consistency across systems
- ✓ Enhanced access control

### Expanded Cost Reporting

F28514

Cost reporting capabilities have been extended to provide additional detail and flexibility for financial analysis.

### Customer impact

- ✓ More granular cost visibility
- ✓ Improved financial reporting accuracy
- ✓ Better support for operational analysis

## Improved Production BOM Costing

 **F29060**

Enhancements to production costing ensure more accurate and consistent cost calculations across workflows and locations.

### Customer impact

- ✓ Improved cost accuracy
- ✓ Better inventory valuation
- ✓ Stronger financial reporting

## Reporting Enhancements

 **F29070**

Operational and financial reports have been updated with improved metrics and clarity to support better analysis.

### Customer impact

- ✓ Clearer performance insights
- ✓ More accurate reporting metrics
- ✓ Improved usability of reports

## CloudLink Highlights

---

### Integrations & Platform Enhancements

 **F29140, F24761**

Enhancements across supported POS integrations improve transaction capture, error handling, and overall data reliability.

#### Customer impact

- ✓ More accurate sales and transaction data
- ✓ Improved system stability
- ✓ Better reporting consistency

### Automated Waste Tracking Integration

 **F28280**

Waste recorded in connected systems can now be automatically reflected in inventory workflows

#### Customer impact

- ✓ Improved inventory accuracy
- ✓ Reduced manual data entry
- ✓ Better tracking of waste and consumption

## LiveLink Highlights

---

### Enhanced Integration Processing

 **F28106**

Platform integrations have been improved to handle more complex transaction scenarios and ensure accurate data processing.

### Customer impact

- ✓ Improved reliability across integrations
- ✓ Better handling of edge cases and exceptions
- ✓ Increased confidence in system data

## Server Manager Highlights

---

### Automated Vendor Order Submission

 F28980

Vendor-managed orders can now be automatically submitted based on defined schedules.

### Customer impact

- ✓ Reduced risk of missed or duplicate orders
- ✓ Improved efficiency in ordering workflows
- ✓ More reliable vendor communication

### 2026.2 Release Bug Fixes

---

This release includes 69 fixes and refinements across reporting, inventory workflows, forecasting, integrations, and financial processing—delivering improved accuracy, usability, and overall system reliability.

### 2026.2 Release Wrap

---

The 2026.2 release continues MacromatiX's evolution toward a more automated, integrated, and mobile-enabled platform. These enhancements improve data accuracy, reduce manual effort, and provide greater visibility and control across operational and financial workflows.
